Sporting Notes.

With the announcement in the despatches that Toronto Maple Leafs have gone to their training camp at Galt, hockey-minded local youths are discussing the possibility of forming a team for the coming season. There was no Senior team in operation here the last season, and the Juniors were left to carry the banner. This they did in an admirable manner, from the playing point of view, but were not so successful, from a financial viewpoint. In fact, they are said to have finished in the red, much to the dismay of a certain rink keeper.

However, an effort will shortly be made to get things straightened out financially, and have the team back in running order.

It is almost a certainty that the Seniors will again elect to remain out of the game. In this event, the onus of carrying on will be on the Juniors.

In this connection, it is to be noted there is likely to be a change in the ranks of the Junior players. With Pat Gannon now in Calgary and likely to stay there through the coming season, and the likelihood of either Louie Miller or Bill Gannon becoming attached to a team in the City, the balance of last season's Stony Plain team will be kept busy holding up their end when called upon to play an ordinarily good outfit in the course of the season.

With the sudden popping into town, on Sunday last, of Eddie Enders, hockeyists were cheered with the thought that Eddie would again have charge of the rink.

Unlicensed Grain Buyers.

An inspector for the board of grain commissioners has been investigating complaints about short weights and non payment for wheat purchased by unlicensed dealers through Alberta.

At Didsbury an unlicensed buyer is said to have been operating, and several farmers had complained of non-payment, following delivery of their grain.

At Leduc 1 farmer complained that a load of 125 bu. had only returned him the price of 115 bu. Another farmer in the same district alleges he had been short changed as high as 20 bushels on a truckload.

The big difficulty is on the part of the farmers themselves in selling to men not licensed by the Board and consequently not bonded.

The Grain Act specifies that all buyers must be licensed and bonded, and farmers selling grain to others than licensed dealers are warned to be careful in that regard.

Duffield Doings.

The funeral service for Annie Scheidman, the 11-year-old daughter of Mr and Mrs Henry Scheidman, who had passed away on October 20, was held on Friday afternoon at the Reformed church, Mewasin. The pastor, Rev C H Heppert, officiated, and interment was made in the local cemetery. She leaves to mourn her loss besides her father and mother, 3 sisters and 3 brothers.

Handling Of Horses Is No Longer Compulsory Subject In Mounted Police Training

Horses are still an important element in the equipment of the Royal Canadian Mounted Police although it is now possible for a man to be a mounted without being a good horseman.

"Equitation," as the science of riding and handling horses is called, is no longer a compulsory subject in the training of Mounted Police recruits.

The work carried on by Canada's ancient red-coated force is constantly becoming more specialized and motor cars, motorcycles, dog sleds, aeroplanes, cruisers and patrol boats combine to push the horse into a somewhat limited role in the transport service.

During the past year a "mounted section" of the force was formed and in this section the horse still occupies his customary place.

The annual report of Sir James MacBrien, commissioner just issued, states that the mounted section was formed due to the difficulty of completing the training of some recruits in the prescribed period of six months. It intensive training in equitation was necessary and also due to "changing conditions of service in the force and the advance of modern and rapid means of travel."

The report also says: "Experience has shown that mounted police when used in connection with dismounted police are of great assistance in the control and dispersal of mobs, unlawful assemblies, etc., and there is no intention of dispensing altogether with the mounted men."

The mounted section consists of several troops of men stationed at strategic points throughout the Dominion, such as Ottawa, Winnipeg, Regina, Edmonton and Vancouver. Each troop consists of about 20 men, all of whom undergo intensive training in equitation.

The latest report covers the fiscal year ended March 31, 1936, and during that period horses owned by the force decreased 26, and at the end of the period numbered 241.

The transport equipment of the Royal Canadian Mounted Police, on March 31 last consisted of the following: 442 passenger cars; 28 motor trucks; 19 motor trucks; 10 cruisers, 17 patrol boats; 222 motor horses, 15 team horses, 388 sled dogs.

Canada's Wheat Trade

Wheat Exports Greatly Increased During First Half Of Current Fiscal Year

Increased value of Canada's wheat trade during the first half of the current fiscal year is indicated in figures released by Hon. J. L. Halsey, minister of national revenue.

From April to September, both months included in Canada's wheat exports were valued at \$109,768,902, compared with \$59,005,180 for the same period of 1935. This was an increase of 86 per cent.

This year 127,445,004 bushels were exported, yielding an average of 36 cents a bushel; a year ago the 71,640,907 bushels which went abroad averaged 22 1/2 cents.

The trade figures for the current half year disclose that out of 13 groups of export commodities, only one recorded a decline. Increases in meats, cheese, plank and boards, newspaper and specially manufactured copper were substantial.

New President Institute

Successful distinguished representative of Canadian colleges and universities, Dr. Robert H. Coombs, former president of the University of Alberta, was installed 15th principal of Queen's University at Kingston, by Chancellor James Richardson of Ontario.

One person in ten in the United States suffers from rheumatism, or some other allergic disease, such as hives, asthma or hay fever.

It is estimated that it takes 30 years to build up the immune system of the body.

The Japanese game of Go, which resembles chess, is 4,000 years old.

Interesting Timepieces

Gentleman Invented A Watch That Played Two Tunes

Mr. John Arnold was a watchmaker. George the Second paid him \$2,000 for a watch which he inserted in a ring. He refused \$5,000 from the Emperor of Russia for a similar watch. So there seems little doubt that he was a good watchmaker. But his fame rests mainly on the fact that, for a wager, he once climbed to the top of the spire of Salisbury Cathedral and it's 401 feet up and sitting calmly on the top, took a watch to pieces, cleaned it, put it together again, and climbed down. His reward was a few pounds.

Other watchmakers may not have been so spectacular, says a writer in Answers, but they have made some interesting timepieces. Fashions usually go in cycles, and the modern craze which women have for miniature wrist-watches is only a survival of the old days, when craftsmen really were craftsmen and mass production had never been heard of.

One gentleman, a Mr. James Cox, once invented a watch with a musical movement which played two tunes. His pride in his work counted more with him than bread-and-butter, for he ruined himself by making musical watches and other toys which no one could afford to buy.

There are still watches going to day which were made hundreds of years ago. One is still going, and keeping time, although it was first wound up in the year 1664.

The "baby" wrist-watch of today has been causing watchmakers some trouble. The accuracy of a watch is governed by the size of the balance wheel, and while, in the rectangular type of wristwatch, the wheel can be of a fair size, there isn't much room in the round type.

And no watch is now being arranged differently. Instead of being grouped together, watch movements are made in two separate layers. The balance wheel has a layer all to itself, and the rest of the watch is in a second layer.

This arrangement allows a wheel of much larger size than before to be used, so that the tiniest wristwatch can now be made very much more accurate.

Rare Albino Bullfrog

Only Known Frog To Spot Blend Of Three Colors

Lilith, rare albino bullfrog of the St. Louis zoo, is gradually turning yellow and the experts are puzzled. When she arrived a year ago Lilith was pure white, and the zoo displayed her proudly.

But a few months ago she began to develop dark, blotchy freckles, and the yellow coloring is now streaking down, and around, two freckles.

This gives Lilith an appearance of mottled white, brown and yellow. The zoo is ashamed of her, and so is she.

Real Albino Frog? Lilith is a "suffo" several eastern zoos have yellow ones and dark frogs can be found on almost any pond. Lilith, though no longer milky white, can still claim the distinction of being the only known frog with a white and yellow color.

Zoo officials can't explain Lilith's yellow streaks. She seems healthy, they say.

Advocate Of Cures

"Herbs" are the cure for many ailments, according to a Chinese grandfathers for 3,700 years. They're good for everything. The effect, in what die-hard Chinese herb advocates hold the Chinese younger generation to be a strange conference held in the heart of San Francisco.

Not A Good Thing

Some years ago the Canadian government made a ruling that no matter how small a live on a small island would be allowed a home and a claim. The government was told no man who wished to live alone, in the last analysis he is a good citizen.

Easy-Going Teaching

Severe Criticism Is Levelled At Present Educational System

One of the most severe criticisms which continue to be levelled at the educational system of this province, says the Toronto Globe, is the inadequate or ineffective instruction which is given in the correct and effective use of the English language.

Following remarks of Mr. J. G. Harvey, chairman of the Ontario Board of Education, to teachers on the importance of training children in grammatical form, correct pronunciation and clear enunciation, the Packet and Times says: "Unfortunately there is a disposition toward easy-going carelessness in these matters which is earning Canadians an undesirable reputation."

This sentiment is echoed by the Ottawa Journal, which remarks: "Apparently we have not been overly successful in teaching this subject, and the schools continue to turn out young people whose sentences are muggy, who are verbose where they should be concise, take too long to get a given point, have no conception of proper punctuation."

Of all the subjects at present on the curricula of both public and high schools there is none more important than those which may be included under the general term English. No other accomplishment gained during school years is so useful and so necessary to almost everyone in after life as the ability to write and speak well.

Without a sufficiently recognized standard, carelessness is liable to result. There is also the fact that modern radio, moving pictures, and a great deal of magazine literature are very powerful factors for the teaching of miss-spelling, mispronunciation, slang phrases and other undesirable tendencies which the teacher has to combat. It is not only a question of teaching correct English, but it is also a case of having the pupil "unlearn" much that he picks up from sources outside of the classroom.

A child adopts the tongue of his parents and forms habits of speech at a very early age. It is necessary, therefore, that sound groundwork be established in the first school years so that later teaching, which is equally important, may be built on a substantial base.

Old Animal Buddies

On a farm at Tyndale, Australia, a kangaroo has developed a remarkable affection for a Jersey cow. The kangaroo accompanies the cow to the pasture, feeds with her, lies down with her at night, and goes to the milking yard and "stands by" while the cow is being milked. If the cow is threatened by a hostile dog, the kangaroo leaps to her rescue and drives off the aggressor.

To every person comes his day. So do wait your chance; Pedestrians have the right of way. When in the ambulance.

Africa has apornials within seven miles of the equator.

"Calico Cat" Quilt Delight To Piece

"Pretty Pussy" may be just a Calico Cat, but he certainly makes a bright and cheerful quilt motif. "Calico Cat," indeed, by using the colors of the cat's fur and body, and work and a gayness, a quilt finished quilt. Dark spots outline the features. Cat-lovers as well as all quilters will be delighted with this quilt. In pattern 5707 you will find the chart of colorization and the diagram of the quilt together with a variety chart. Diagram of quilt to help arrange the blocks for a single bed and bed set, and a diagram of block which serves as a guide for the quilt.

To obtain full details and a copy of the pattern (coin preferred) to Housewife Arts Dept., Winnipeg Newspaper Union, 175 McDermott Ave. N., Winnipeg.

There is no Alice Brooks pattern book published.

Population Of Prairie Provinces Is Shown To Be Drifting Northward

Attar Of Roses

Fortune Manufacturer From Bulgaria Gives Some Light On Business

Carrying in his vast pocket the scent of an acre of roses, Peter Shipkoff, Bulgarian manufacturer of attar of roses, arrived in Montreal. "It takes between 3,500 and 4,000 pounds of rose leaves to make one pound of attar," he told a reporter in the Mount Royal Hotel, and then pulled a little bottle holding an ounce of the oily liquid out of his pocket.

Instantly a rose garden seemed to come to full bloom in the lobby of the hotel. The reporter put it within an inch of his nose and nearly choked. Concentrated odor was unpleasant.

"Bulgaria is the largest producer of attar of roses," Mr. Shipkoff continued. "We have 70,000 hectares of rose gardens in central Bulgaria. The roses are all the 30-leaved, crimson Damask rose, which we find to be the most powerfully scented."

"This year's production," he said, "is small. It is not more than 2,000 kilograms for all Bulgaria. Yet prices still are low. They are between 60 and 110 an ounce. In pre-depression days the price was \$25 an ounce."

Farm Life Advantages

Offers Best Opportunities Of Any Industry In Canada

Farming offers the best opportunities of any industry in Canada to the average man, Hon. J. G. Gardiner, minister of agriculture, told a group of farm boys at Ottawa.

"There is no place in Canada where the average man can make a more comfortable living, have greater independence, greater freedom of thought or more abundant opportunities for home life than on the farm," said Mr. Gardiner.

In the past many people had a wrong conception of farming, he thought. Many farmers had tried to give their children an education in order that they could leave the farm and have an easier life. This was a natural consequence of the hardships the pioneer farmers of Canada had met. The proper attitude was to strive for education and culture but to remain on the farm.

Young farmers should get the best education they could. Culture had a place on the farm as well as in the office and a man was no worse as a farmer if he had a university degree.

The sweetest smelling orange blossoms come from the sour orange tree.

Perfumes were used in Egypt as early as 3500 B.C.

Population of the prairie provinces is moving northward.

Figures for the 1936 five-year census of the three provinces published by the census and commerce department show the increase in the six most northerly electoral districts amounts to almost 17 per cent. This compares with an increase of 3 1/2 per cent. for all districts.

The total population of Manitoba, Saskatchewan and Alberta is 2,416,050 against 2,353,528 in the 1931 census. In the six northerly electoral districts the population has increased from 237,000 to 282,538. The growing movement is attributed by the department mainly to three factors:

Taking up of farmlands in the newer districts by farmers who have given up their old farms in the drought stricken areas of the more southern sections of the province; development of mining fields in the north, business developed by the Hudson Bay railroad and the new northern ocean terminal at Port Churchill.

In northern Manitoba the district of Churchill has a population of 83,758, an increase of 1,613 over that reported in 1931. In the southern section of this district there are 3,484 occupied farms while in the northern parts are the towns of The Pas and the adjoining Flin Flon mining district. The port of Churchill also adds to the population.

In Saskatchewan the districts of Melfort, Prince Albert and North Battleford have a total population of 151,350, an increase of 29,281. Occupied farms in these northern sections of Saskatchewan number 26,893.

In Alberta the electoral districts of Athabasca and Peace River cover the whole of the northern section of the province. The population of Athabasca has increased from 39,102 to 47,896 in the five years and that of Peace River from 42,761 to 48,758.

Race Of Giants

Survey Shows That Children Of Today Are Two Inches Taller Than Grandparents

Signs that earth's inhabitants may be growing slowly into a race of giants were noted in a world-wide study of heights and weights of young people.

Every 12 1/2 years for the last 30 years, almost four-tenths of an inch has been added to the height of the average college student, the Journal of the American Medical Association reported in an editorial survey.

For the population as a whole, the Journal said, the rate of growth is "somewhat smaller."

In the United States, it continued, "children of today entering colleges and universities seem to average two inches taller and weigh some seven pounds more than did their parents and grandparents."

A similar observation has recently been made abroad.

To support its conclusions the editorial recalled these figures: "In Germany boys entering school between six and six 1/2 years of age in 1905 were 106.7 centimeters tall. A similar crop of children in 1923 was 114.7 centimeters tall."

In Norway the average height of military recruits increased 3.01 centimeters between 1875-1877 and 1923-1925.

In Holland recruits were 6.87 centimeters taller in 1921-1922 than in 1903-1907.

In Sweden the rise was 6.4 centimeters between 1885-1890 and 1901-1905.

In 1931 twenty students in Harvard University, Year Class of 1931, Smith and M.L. House, averaged 68 1/2 inches in their average height in a generation.

As the students grew taller, they grew heavier in proportion.

It is longer than the average height for those 12 years old in 1923, but should be also considered in relation to the highways, the average height of a man.

Some people waste a lot of time talking you what they said to somebody else.

To Alkalize Acid Indigestion Away Fast

People Everywhere Are Adopting This Remarkable "Phillips" Way

The way to gain almost incredibly quick relief, from stomach condition arising from overacidity, is to alkalinize the stomach quickly with Phillips' Milk of Magnesia.

You take either two teaspoons of the liquid Phillips' after meals or two Phillips' Milk of Magnesia Tablets. Almost instantly "acid indigestion" goes, gas from hyperacidity, "acid-headaches"—from over-indulgence in food or smoking—and nausea are relieved. You feel made over; forget you have a stomach.

Fry this Phillips' way if you have any acid stomach upset, get either the liquid "Phillips" or the remarkable, new Phillips' Milk of Magnesia Tablets. Only 25¢ for a big box of tablets at drug stores.

ALSO IN TABLET FORM:
Each tiny tablet is the equivalent of a teaspoonful of liquid Phillips' Milk of Magnesia.

MADE IN CANADA

PHILLIPS' MILK OF MAGNESIA

WORLD HAPPENINGS BRIEFLY TOLD

The Montreal Daily Herald, one of the oldest newspapers in Canada in point of continuous service, celebrated recently its 125th birthday.

A machine that tests 3,000 eggs an hour for quality and grades them by weight was on show recently at the Grocers' Exhibition at Royal Agricultural Hall in London.

Quebec legislature adopted Provincial Treasurer Fisher's budget, which estimated deficit of more than \$18,000,000 during the next fiscal year.

The American College of Surgeons announced approval of 2,577 hospitals in Canada and the United States out of a total of 8,500 surveyed to determine agreement with its standards.

Arthur Senior attained the highest speed on the road so far recorded by a motorcyclist in Australia when he reached 130.458 miles an hour. His average speed was 123.85 miles an hour.

The mortality rate from tuberculosis in the southern Cape Breton mining district is greater than in any other section of Canada, it was reported in a survey by Dalhousie University.

Appointment of Ray Brown, of the Canadian Press Ottawa Bureau, to the position of director of publicity for the national employment commission, was announced by Justice Minister Ernest Lapointe, acting prime minister.

Organization of a re-employment service rather than unemployment relief should be a chief concern of governments, Miss Charlotte Whitton of Ottawa, executive director of the Canadian welfare council, declared in addressing the fourth Manitoba conference on social work.

Sir Herbert Marler arrived recently at Washington to assume his duties as Canada's new minister to the United States. He replaces William Herdridge, who resigned from the Washington assignment a year ago upon the accession to power of the King government.

China has constructed and opened to traffic a highway 500 miles long, crossing several mountain chains, that connects the capital of Chong and Szechwan provinces.

Trains from London to Edinburgh have photographs and play records describing points of interest along the route for passengers.

For Canadian Writers

Short Story Contest For British Empire Authors Only

Opportunity for Canadian writers to win three cash prizes is afforded by the announcement of a short story contest for British Empire authors only.

The contest is being conducted by the well known and established American firm of literary agents, Paul R. Reynolds and Son acting through their London correspondent, John Farquharson. The prizes are £125 (or its approximate equivalent of \$625) for first, £75 (or its approximate equivalent of \$375) for second and £50 (or its approximate equivalent of \$250) for third.

If the winning stories earn more than the amount of the prize from sale of world rights, such further earnings will be paid to the author after deducting the usual agent's commission, the sponsors state.

Also any story which does not win a prize but which attains the standard of American and British magazines will be offered for sale, it is added.

No manuscript of over 10,000 words will be considered, the agents further declare, and prizes will probably be awarded to stories of between 3,500 and 4,000 words.

The competition closes December 31, 1936.

Manuscripts must be addressed to Paul R. Reynolds and Son, care of John Farquharson, 8, Halsey House, Red Lion Square, London, W.C.1, England.

Paper Changes Ownership

Toronto Globe, Founded In Pre-Confederation Days, Passes Into New Hands

Ownership control of the Toronto Globe, metropolitan daily founded in the pre-Confederation days of Canada's history, has passed into the hands of C. George McCullagh and William Henry Wright.

William Gladstone Jafray, president and publisher of the 92-year-old newspaper since 1914, announced that he had relinquished his interest and connection with the morning paper, and that 60 per cent. of the shares of the company had been purchased by the new owners. The amount involved was not disclosed.

The Globe now carries in its masthead the name of Mr. McCullagh, who, at the age of 31, became the fifth president and publisher of the paper. He thus becomes head of the newspaper which 20 years ago he hawked on London streets.

The new president, in assuming control, announced that the historic traditions of the paper will be continued; that politically it would be Independent-Liberal.

Train Despatching By Phone

Is Superseding Telegraph For Transmission Of Messages

The telephone gradually is supplanting the telegraph in train despatching, according to reports made to the telegraph and telephone section of the Association of American Railroads.

"The telephone," said a statement issued by the association, "on Jan. 1, 1936, was being used in the transmission of train orders over 148,799 miles of road, or 63.53 per cent., while the telegraph was being utilized only over 92,486 miles.

"This is a material change from conditions prevailing in 1920, when the telephone was being used over 119,554 miles of road, or 48.5 per cent., while the telegraph was used over 134,667 miles.

"Particularly has the telephone proved its superiority in emergencies in train operations: By using a way station or portable telephone the engineer or conductor can communicate directly with the train dispatcher or division superintendent, thus giving him more first-hand information in less time than with the telegraph."

Tests show that an automobile that can travel 18 miles on a gallon of gasoline at a speed of 30 miles an hour, will travel only 12 or 13 miles on a gallon at 60 miles.

It is estimated that thanks to modern electric appliances, the modern woman works 67 hours a week, 28 less than 30 years ago.

Perhaps a woman's worst weakness is her husband.

SUNDAY SCHOOL LESSON NOVEMBER 1

LAW, LOVE, AND TEMPERANCE

Golden text: It is good not to eat flesh, nor to drink wine, nor to do anything whereby thy brother stumbleth. Romans 14:21.

Lesson: Romans 13:1-14. Devotional reading: Romans 14, 13:21.

Explanations And Comments

Obeys the Law, Romans 13:1-7. "Every subject must obey the government-authorities, for no authority exists apart from God; the existing authorities have been constituted by God. Hence anyone who resists authority is opposing the divine order, and the opposition will bring judgment on themselves. Magistrates are no terror to an honest man, though they are to a bad man. If you want to avoid being alarmed at the government authorities, lead an honest life and you will be commended for it; the magistrate is God's servant for your benefit. But if you do wrong, you may well be alarmed; a magistrate does not wield the power of the sword for nothing, he is God's servant for the infliction of divine vengeance upon evil-doers. You must be obedient, therefore, not only to avoid the divine vengeance but as a matter of conscience, for the same reason as you pay taxes—since magistrates are God's officers, bent upon the maintenance of order and authority. Pay them all their respective dues, tribute to one, taxes to another, respect to this man, honor to that." (Moffatt's translation).

Love Fulfills the Law, Romans 13:8-10. When Jesus was asked to name the greatest law of all, he answered, "Love." He taught that when one loves he needs no other law. As Luther trenchantly said, "The law discovers the disease; the gospel gives the remedy."

Owe no man anything, save to love one another: for he that loveth his neighbor hath fulfilled the law. "Temperance, Rom. 13:11-14. Paul is still looking for the return to earth of his Lord, and the special appeal of the last four verses of our text is based upon the expectation that the return may take place at almost any time. That expected return did not take place in Paul's day, and here and there some have been looking for it and expecting it in all the centuries that have followed, until now the majority of Christians have ceased to look for it. But in a sense, Paul's line of argument is still effective. Time is hurrying on and life is short, and for the Christian clean, wholesome, honest living is the only thing in order. There is a Christian standard of conduct, which shuts out all self-indulgence and ill-will and self-seeking. A Christian's conduct should be above reproach.

Termites are not really worse as wood-destroying pests in the United States, but people are more alert to recognize the damage they do, says a government entomologist.

Italian Rule In Ethiopia

Red Cross Doctor Says It Is Better Than Chaos And Anarchy

Dr. Thomas A. Lambie, formerly of Toronto and commander of the Ethiopian Red Cross during the Italian invasion, said in New York that "nobody is going to give Ethiopia back to Emperor Haile Selassie." "Ethiopia is still far from being occupied," he said, "but every true friend of Ethiopia believes Italian occupation is far better than the dreadful condition of chaos and anarchy that now prevails, where life is of no value and even women and children are not spared by hands of looters and murderers."

An East African dinosaur of millions of years ago was a 30-foot giraffe-like animal. It had a neck 10 feet long.

In the United States and Canada, folks consume approximately seven grapefruit to every 100 oranges.

Railway traffic in Bulgaria is heavier than a year ago.

CHILDREN'S COLDS

The average age of the capital ships in the British and American Navies is 18 years. In the French Navy 22 years, in the German 20.

It is officially estimated that about 7,000,000 letters and 150,000,000 parcels are delivered in Great Britain during the year.

You'll Delight A Child With These!

PATTERN 5247

This sturdy pair, dressed in the "Sunday best" are sure to walk right into the heart of some wee tot. You'll have fun, too, making both the dolls and their bright finery, 'specially if your scrap bag furnishes you with gay odds and ends. Hair and features are done with a few simple embroidery stitches. Grand indeed for gifts, are Sambo of the checkered overalls, and Mammy, in apron and kerchief. In pattern 5247 you will find a transfer pattern for a doll about 14 inches high; patterns for making the clothes; directions for making doll and clothes; material requirements.

To obtain this pattern send 20 cents in stamps or coin (cash preferred) to Household Arts Dept., Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg.

There is no Alice Brooks pattern book published

Warehouses at Calgary, Edmonton, Regina and Winnipeg

ITALO-GERMAN YOUTH TO RESIST BOLSHEVISM

Berlin.—A new move toward welding Italo-German youth into a bulwark of European resistance against Bolshevism was announced by Eadur Von Schirach, German leader of youth, in the presence of Count Galeazzo Ciano, Italian foreign minister, and 20,000 Hitler youths and girls.

An institute for Italo-German youth leadership will be founded in Rome and Berlin, he declared at a gigantic rally in the Sports palace, for the exchange of youth leaders between the two countries.

The idea of the exchange, he said, will be to familiarize young people in each country with cultural, economic and political conditions and achievements of the other as well as further cementing friendly relations between the two countries.

Rome.—Italy and Germany will recognize the insurgent government of Spain almost immediately after the Fascist armies occupy Madrid, well informed sources said.

Agreement on this policy was said to be one of four important issues on which the nations reached accord after first conversations of Count Galeazzo Ciano, Italian foreign minister, with Baron Konstantin von Neurath, Germany's foreign minister, in Berlin.

Authoritative sources said Germany had agreed not to return to Geneva unless the League of Nations was reorganized on lines of the Italian plan for a directorate of the great powers.

Germany and Italy both, the report said, want a new Locarno treaty based on the old pact and both reject the British idea of two treaties—one for northern Europe and one for the south.

Rome and Berlin were reported to have agreed to divide the Danubian regions into zones of commercial influence.

Importance Of Mining

Is Playing Important Role In Bringing Back Recovery

Ottawa.—Hon. T. A. Crerar, minister of mines and resources, is enthusiastic over the growing importance of mining in Canada's industrial picture. Just returned from a trip through western Canada and visits to many mining areas, Mr. Crerar said mining was playing an important role in bringing about economic recovery in Canada.

The minister said he visited the Central Patricia and Red Lake districts in northwestern Ontario and the Bridge River and Trail areas in British Columbia. Much of his traveling was done by automobile. One of the greatest needs of the mining area was cheaper transportation, he said. Many enterprises were being carried on under the handicap of heavy transportation costs and greater progress could be made if cheaper transportation were available.

Canada's gold production this year would be close to \$135,000,000, Mr. Crerar said, and the significance of this for the general economic position could be appreciated when it was recalled that in 1929 the country's gold production, equated at the present price, was only about one-third of this figure.

Will Go To New York

Mounted Police To Stage Exhibition Here At Home

New York.—A detachment of 37 Royal Canadian Mounted Policemen, led by Inspector A. T. Belcher, will arrive in New York on November 2 to present a nightly exhibition ride at the National Horse Show in Madison Square Garden, November 4-10, it was announced.

With the exception of Staff Sergeant H. J. Soame, none of the men has been to New York before. Sergeant Soame, riding instructor of "N" division, stationed at Ottawa, from which the detachment is drawn, has been training the men for the past two months.

Russia Fears War

Spanish Trouble Has Created Dangerous Situation In Europe

Moscow.—Russia is ready to quit the Spanish non-intervention pact and sent warplanes to the Madrid government, authoritative sources said.

With the insurgents striking ever closer to Madrid, these sources said, the Kremlin feels it must send munitions and planes as the only way to prevent establishment of another Rightist dictatorship similar to those in Italy and Germany.

Highest officials were agreed recent developments growing out of the Spanish war have created "the gravest days" in Europe in two decades.

Dictator Josef Stalin, informed persons said, is convinced Europe is nearing the abyss of another war, and Russia must make her influence felt immediately and in the strongest and most unmistakable terms.

The Potential West

Says Western Canada One Of The Richest Countries In The World

Montreal.—European nations and the United States are becoming "more and more aware that western Canada is potentially one of the richest countries in the world," Rev. A. J. Vining of Toronto told the Baptist convention of Ontario and Quebec.

"New and unusually important opportunities for economic expansion existed in vast and rich northern sections of the three Canadian prairie provinces," the secretary of the western mission board stated.

His report stated new development already went forward and 52,000,000 acres of valuable agricultural territory were available for cultivation.

Court Mourning Over

London Society Hostesses Preparing For Autumn Festivities

London.—Royal court mourning for the late King George ended with society hostesses busily preparing for an autumn whirl of festivities heralded as the most brilliant in many years.

For the first time since King George died members of the royal family will now be able to attend theatre, receptions and balls.

Both King Edward and the Duke of York have many engagements to fulfill in the coming weeks. But in the middle of November His Majesty will slip away from London and talk with his poorer subjects in the hard-hit mining towns of Wales.

Cargo Of Foodstuffs

Russian Ship Sails From Leningrad To Spain With Supplies

Moscow.—The first Russian ship to carry supplies from Leningrad to Spain sailed with what was announced as a cargo of foodstuffs for victims of the Spanish civil war.

It was officially stated the steamship *Turkiskib*, which normally plies between London, Hamburg and Leningrad, left with 3,000 tons of flour, 2,000 tons of sugar, 800 tons of codfish, 500 tons of candies, 200,000 boxes of canned foods and 10,000 boxes of clothing.

These goods, it was stated, were all purchased by subscriptions from Russian workers.

Goods For Wheat

Co-operative Directors From Glasgow Confer At Edmonton

Edmonton.—Exchange of goods for Alberta wheat on a barter system "would be very acceptable to us provided proper financial arrangements could be made," it was stated here by Robert Murray, director, and H. W. Leckie, secretary-director, of the Scottish Co-operative Wholesale Society of Glasgow. With D. Muir, manager of flour mills and grain buyer for the society, the Co-operative directors from Glasgow were interviewed on their arrival from Glasgow on an annual Canadian tour.

Rescue Refugees

Gibraltar.—The British destroyer *Gallant* arrived here from Malaga with 123 refugees from the civil war zone, mostly Spaniards. The *Gallant* departed 22 more refugees from Cartagena. 2174

By a re-organization of four Government Departments at Ottawa there has been created a new Department of Mines and Natural Resources. It will be divided into five units with a director in immediate charge of each unit. Mr. F. C. Blair (above) now Assistant Deputy Minister of Immigration, will be Director of the immigration unit.

Stranded In Sub-Arctic

Crew Of Motorship On Great Slave Lake Must Wait For Freeze-Up

Port Resolution, N.W.T.—Captives of the sub-Arctic, 24 men, aboard the motorship *Silver Queen*, ice-locked on Great Slave Lake, prepared to spend several weeks of enforced imprisonment on the boat waiting for the northern freeze-up. Fort Resolution is about 675 air miles north of Edmonton.

Departure for Edmonton of two aeroplane pilots who had been poised at Fort Smith, N.W.T., ready to take the crew from the *Silver Queen* indicated hoped-for favorable weather was not expected and Capt. H. L. Sacret and his men would have to stay on the boat until after the freeze-up, probably about Nov. 21.

Snowstorm In Colorado

Three Motorists Lose Lives In Accidents Attributed To Storm

Denver, Colo.—Three motorists lost their lives in automobile accidents attributed to a snowstorm which swept over most of Colorado and Wyoming.

Mary Steadwell, 40, author and social director at the University of Colorado, was killed in an automobile collision in a blinding snowstorm at Denver.

Two men died of injuries suffered when their car overturned near Trinidad, Colo. They were C. R. Garston, 42, Elkheart, Ksa, and Bonifacio Vigil, Weston, Colo.

Want Paper Banned

Toronto.—A Toronto Branches branch of the Canadian Legion, complaining a recent issue of a *New York* Sunday paper, *Longing*, on the private life of the king was "deplorable and distasteful," passed a resolution asking the newspaper to be banned in Canada.

Grant For Alberta

Federal Advance For Relief Purposes In Drouth Area

Edmonton.—Federal grant of \$1,800,000 has been made to cover the Dominion expenditures for feed and free freight to give relief to the drouth area in Alberta until March 31 next; it was announced here by John Vallance, chairman of the committee named to administer the Prairie Farm Rehabilitation Act. He conferred with provincial government officials. No figures were available on direct relief which the Dominion also has undertaken.

Mr. Vallance was here with M. Mann of Regina, technical agriculturist for the committee, who has been loaned to supervise the federal relief for the drouth areas in the three prairie provinces. In visiting various points Mr. Vallance is giving his assistance and advice to Mr. Mann.

Early Wheat Shipment

Sixty Years Ago First Consignment Of Wheat Left Western Canada

Winnipeg.—Sixty years ago, the first shipment of wheat from western Canada left Winnipeg.

To commemorate the occasion, Richard Speer, 72, who as a lad of 12 sat on a load of wheat being hauled here to make up the initial shipment, was presented with a walking stick by the Winnipeg Grain Exchange.

Trading in the big pit was stilled as President W. J. Dowler made the presentation to mark the jubilee. The first shipment was of 997 1/2 bushels, purchased from the Red River valley farmers at 85 cents a bushel.

No Money Is Used

Cow And Shirt Exchanged For Insurance Policy

Wingham, Ont.—Barter has gained a niche in the insurance business, according to a report here, but it took a gaudy, red-broadcloth shirt worn by the insurance agent to clinch the deal.

The agent, in his preliminary conversations with a Wingham farmer, agreed to take a cow in exchange for a policy. When the agent arrived with a truck to get the cow, his brightly-colored shirt caught the eye of the farmer and before the latter agreed to sign on the dotted line, he persuaded the agent to include the shirt in the deal.

Medical Supplies

Montreal Surgeon Goes To Madrid To Aid Suffering

Toronto.—Dr. Norman Bethune, Montreal surgeon and head of the Canadian medical mission to Spain, conferred with Spanish loyalist leaders here prior to his departure for Madrid with large quantities of medical and surgical supplies. "I'm only heading the call of 1,000,000 people suffering and needing medical aid," he said. "I'm not going over for the adventure. Even though Madrid is besieged, we'll get in by aeroplane."

DEFENSE PLANS FOR CANADA ARE COMPREHENSIVE

Ottawa.—High up on the cabinet's agenda when Prime Minister Mackenzie King returns from Geneva are expected to be national defence plans. Comprehensive proposals for extension of the defence set-up will be submitted by the government at the next session of parliament, it is believed.

Hon. Ian Mackenzie, minister of national defence, doubtless will have definite suggestions ready to lay before his cabinet colleagues.

While heads of the three forces—naval, military and air—naturally are not going to announce details of plans they have worked out, military experts have recently taken the view Canada could provide reasonable adequate defence against any enemy except the United States at a cost she could afford. It will be for the cabinet to decide to what extent the plans will be carried out.

In view of the great distances an enemy would have to travel to attack either the Pacific or Atlantic coasts, an air force would be suggested that would be numerically strong enough to overpower any plane fleet that could be brought across either ocean by carriers or direct flight.

The plan would also provide enlargement of destroyer flotillas on both coasts to co-operate with the air force and submarines as a defence against naval attack. There is a suggestion cruisers be added to the fleets.

Coastal defence proposals also envision something increased armaments along both Atlantic and Pacific shores. Under such an arrangement and with conditions of warfare, as they have developed, it is believed such a defence force could repel an invasion of any enemy travelling by air to attack this country.

Approximately \$5,000,000 more will be spent on the three services this year than last. The 1935-36 estimates were \$28,400,000, of which \$8,317,000 was for relief camps, leaving a balance of \$20,083,000 for the services and capital expenditures.

Plenty Of Work

Ontario Youths Satisfied With Farm Experience In West

Goderich, Ont.—"There's plenty of work in the Canadian west for those who want to work," chorused three husky Bruce county youths, passing through here in an old motor car en route to their home near Fort Elgin, Ont., after five months on the prairies.

The boys were Harold McArthur, Harold Cannon and Alvin Böttger, all in their twenties. They were in high spirits with money in their pockets.

"We went to Rimbey, Alta., in May and were never idle a day until we left for home," said McArthur. "We made \$1.50 a day and board for general farm work and \$2.50 a day and board during the threshing season. We said we were from Bruce township in Bruce county and the job was ours for the asking—just like that. And we were paid in real coin of the realm—no scrip for us."

Heavy Sentence

190 Years Imprisonment For Fifteen-Year-Old Youth

Chicago.—Fifteen-year-old Roland Munroe, Jr., was convicted of beating an elderly crippled widow to death with her own cane and heard his punishment fixed by a criminal court jury at 190 years imprisonment.

Deliberating slightly more than three hours, the jury disregarded the defence contention that young Munroe, an effeminate mannered high school student given to curling his red hair and spraying himself with perfume, was insane by reason of his abnormal tendency.

Warring Currency

Montreal.—A warring currency and trade manoeuvring constituted threats to the permanency of economic recovery made since 1933 was suggested in an address by F. W. Pined, Quebec's senior trade commissioner in Canada.

Our picture shows a Scottish Ambulance Unit of seven cars and a personnel of 20, embarking at Dover for Calais, on the way to Spain. This is likely the unit which the Spanish Government charges was bombed in broad daylight on Oct. 4 by the insurgent forces.

Stony Plain and District.

The Henry Eaders motor party returned from Wembley on Sunday, bringing with him Messrs Geo Ducholke and E. Eaders.

Miss Marjorie Young has returned to Stony Plain, after a week-end visit to her home at Mewassin.

Mr Edward Briake's motor party, which had been touring the Peace River district for some time, returned home on Sunday.

The manager of The New Lunch Counter next Young's Groceries is offering a prize of \$5 to the person choosing the most appropriate name for the new tea-filling station.

The dances on Friday of the S.P. Hi students was well attended.

BUTTER AND EGGS WANTED at The Royal Cafe.

"Shower" at Mewassin.

A "shower" was held at the home of Miss Marjorie Young of Mewassin, in honor of a friend, Miss Ella Krause, whose marriage is to take place this week.

The number of handsome presents which were showered on the bride-elect bore testimony to the esteem in which she is held by a large circle of friends.

Tea and light refreshments were served by the young hosts, assisted by Miss Sheila Young and Mrs J Fryer.

Among those present were:

Mrs Jac Schiedeman
Mrs Ken Godfrey
Mrs Krause
Mrs Ellen Fryer
Mrs Bert Edwards
Mrs Ben Erickson
Mrs Eugene Fassette
Miss Susan Kyle
Miss Julia Fryer
Mrs Willard McKay
Miss Sheila Young
Miss James Young
Miss Ella Krause
Miss Audrey Edwards
Miss Bernice Erickson
Miss Albina Fassette
Miss Manetta McDonald

Sale in Stony on Saturday.

Mr John Brunda, the cattle buyer, who has been operating a hog ranch on the west side of town, is going out of the hog-raising business, owing to the high cost of feed. He has disposed of his brood sows, and intends clearing out the balance of the animals on his hog ranch. To effect this, he is offering some 40 hogs, averaging about 60 to 120 pounds, at the sale in Stony Plain on Saturday next.

At the same sale Mr Peter Brunnstahl is clearing out the stock and implements from his Glory Hills farm, and is moving these to the Zucht Barn on First avenue, in readiness for the sale on Saturday.

The Young Wife's Secret.

They had been married less than a year and were still very much in love with each other. Upon the young husband's return home one evening the young wife coyly saugled into his arms, and hiding her blushing face on his shoulder softly whispered:

"Oh, dearest, I have such a wonderful something to tell you. Soon—soon—there is someone coming, and then there will be in our home."

"My precious one! Are you sure of this being true?"

"O, sure! Mother is coming to pay us a long visit."

Boxing Routs in the City.

A series of boxing bouts is billed for Wednesday next, Nov. 4, in Memorial Hall, in Edmonton. Among the names of the artists of the padded mit who are to participate is that of Don Carmichael, our local champion. Don is always sure of the support of his local followers, who feel that, whatever happens, Don has been trying. Don will go up against Mickey McGuire of Edmonton for 6 rounds. Others on the card are—

Eord Smith vs Jack Tebo, 10 rounds.

G Grayston vs Eddie McSpornan, in the 8-round semifinal.

A good-sized delegation of local boxing fans is expected to be in attendance.

Holborn Happenings.

One of the oldtime settlers of the Holborn district, Mr Ollie Rigby, met with a painful accident last week, when he had his leg fractured in 5 places after being hit by a tree stump which he had just uprooted with a team of horses. Ollie was out with the team alone at the time, but it is believed he fell just as the stump was breaking free of earth. The heavy wood struck his leg a terrific blow. He was taken to the Misericordia hospital, where he now is, with his leg bound in a plaster cast.

The recent snow and rain storms have mused up the roads somewhat, and have made these rather difficult for vehicular traffic.

Don't forget the Harvest dance at Holborn Hall tomorrow Eve., Oct. 30. Urse's Melody Four will provide the music. Admission 35c. A quilt and other smaller prizes will be drawn for.

The social creditor group in this district are preparing to attend the big rally meeting in Stony Plain on Nov. 4, when an address will be made by Walter H. Kuhl, who is expected to give an account of the designs of social credit members at Ottawa.

U. of A. May Lose \$18,000.

It was reported in Edmonton on Monday that the action of the provincial government in reducing interest rates by an average of 2 1/2 per cent, effective June 1, 1936, will hit the University of Alberta by at least \$15,000. A previous estimate had placed the figure at \$18,000.

Besides some \$250,000 of other securities, University has one \$500,000 5 per cent provincial bond purchased with funds available from the Rockefeller Foundation, on which the interest loss will be \$12,500.

Heard on College Heights.

"What made your wife think that you'd been out with another woman?"

"She said my clothes smelled of tobacco."

Here and There

Outstanding success has attended the publication of J. Murray Gibbon's book, "Steel of Empire," in which is told the history of transportation in this country. The first edition of this comprehensive and finely illustrated work on Canada's history was sold early and another is now out in preparation for sale as Christmas gifts, for which it is anticipated there will be a heavy demand.

Effective January 1, 1937, contributory pensions for Canadian Pacific employees will replace the 35-year-old non-contributory system. Since the latter system's inception in 1903, the railway has paid out \$18,200,000 in pensions. Under the new plan, officers and employees will contribute three per cent. of their wages or salaries. Pension rates will be unchanged and pensioning age will be the same as heretofore.

Twenty-three arrivals from British and continental ports and twenty-three departures by Canadian Pacific liners will constitute the passenger service from Saint John and Halifax during the coming winter season. It is announced from company headquarters. Season will commence November 28 and close in mid-April.

Alan M. Irwin, of Montreal, has been awarded one of the Pamphile Lemay prizes for his book, "and ships—and sailing-wax," it was announced recently by Quebec Provincial Secretary Paquette. The book, written during a cruise around the world in the Canadian Pacific liner Empress of Britain, received the only English award in the Lemay prize list. "and ships—and sailing-wax," which is published in Canada and Great Britain by Macmillan's, deals with the lighter side of cruising, and is a valuable, if informal, aid to would-be travellers.

Two Canadian Pacific scholarships at L'Escole Polytechnique and L'Escole des Hautes Etudes Commerciales respectively have been awarded to Gilbert Froulx, 18, son of Arthur Froulx, warehouseman, C. P. Express Company, Montreal, and Roger Buschre, 18, son of Philip Buschre, trucker and checker, Place View freight office, Montreal. Each is tenable for five years.

J. C. Patteson, who succeeds Sir George McLaren Brown, European general manager, Canadian Pacific Railway, London, England, with the title of European manager, was born at London, Ont., and educated at the Model School, Toronto; Ridley College, St. Catharines; and the Royal Military College, Kingston, and served overseas with the Canadian Field Artillery from June 1916, to September, 1919. During 1925 Mr. Patteson was general agent in Toronto for the steamship department and has also held the positions of assistant general agent, New York; general agent, passenger department, Philadelphia; and general agent, steamship department, Chicago.

The annual competition sponsored by the Canada Travel Bureau, Canadian Pacific and Canadian National Railways, for the most beautiful and for the largest maple leaves is now open to the public. The leaves must be gathered in Canada and sent from a Canadian post. Prizes totalling \$215 will be distributed as follows:—Most beautiful leaf, \$100; 2d, \$50; 3d, \$20 and 5d. Largest leaf, \$30 and \$10. Contest closes November 1 and entries should be forwarded to Canada's Maple Leaf Contest, P.O. Box 2500, Montreal.

Policyholders Own the "Assets" of Life Insurance Companies

As a great co-operative enterprise, Life Insurance has built up Assets in Canada totalling, approximately, two billion dollars. Yet these Assets are relatively small when it is realized that they are jointly owned by about 3,500,000 policyholders—one-third of Canada's population.

On the average, each policyholder owns \$571 as his share of the total Assets in Life Companies operating in Canada. Obviously, the great majority of policyholders are men and women of ordinary means—thrift people who, year by year, have entrusted to Life Insurance part of their savings so that they may have financial security against the uncertain future.

These policyholders represent the best type of Canadian citizens. They have sought to preserve their financial independence, and,

as thrifty citizens, neither they nor their dependants are ever likely to become charges upon government or municipal relief.

To protect the interests of these 3,500,000 Canadian policyholders, Life Insurance Companies have invested their Assets in government and municipal bonds—in first mortgages—in public utilities and industrial enterprises—and in other authorized securities.

The soundness of the investment policy of the Companies has been tried and proven during periods of severe financial stress. Governing and corporate bodies in which policyholders' moneys are invested have, until recently, maintained the integrity of their obligations. This has made it possible in turn for the companies, in their capacity as trustees for the policyholders, to fulfill every obligation guaranteed by their policies.

Now, however, there is a growing tendency to repudiate, by legislation, public and private debts, regardless of the debtor's ability to pay. Legislation which tends to destroy the ownership of public and private property places an unjust burden upon life insurance policyholders.

Life Insurance

The World of Wheat.

By H. G. L. Strange, Director "Crop Testing Plan."

The wealth, welfare and prosperity of farmers, and, indeed, of all of us, in Western Canada depends mainly upon the sale each year to foreign countries of large quantities of Canadian wheat at satisfactory prices.

Between 200 and 300 million bushels a year, it seems to me, will have to be exported if a reasonable standard of living for our producers and other people is to be assured.

Our large annual sales in the past have depended upon the buyers in no less than 72 different countries demanding or "wanting" Canadian wheat. Our problem, then, can be stated very simply. It is that somehow we must induce the buyers of 72 countries to "want" between 200 and 300 million bushels of Canadian wheat each year, and to pay a reasonable price for it. Can this be done? Yes, I at least believe it can, provided for one thing that we maintain, and if possible increase, the present margin of quality or "strength" that Canadian wheat enjoys over the "strength" of all other wheats in the world. But we must remember that meanwhile other countries are steadily improving the quality of their own native wheats. Canada, therefore, will undoubtedly have to increase the efforts

she is now making in order even to maintain her present superiority in wheat quality.

The recent substantial increase in the price of wheat has been brought about by the complete disappearance of the "burdensome" world surplus which has tended so to depress world prices since 1930.

Rainfall that may occur in Australia and the Argentine in the next few weeks is the most important factor now governing world prices. If abundant rains soon occur the price of wheat will probably fall. If generous rains do not soon fall, however, the price will probably rise still further. The Buenos Aires "Futures" market for the moment is an excellent price barometer.
